on a critical notice of the Manuscript we extract the fol-

towing:

"This is an American novel, and shows a good deal of prowise, and I am inclined to think will warrant publication. The
plot has many elements of interest, and is well sustained
throughout. It has specimens of
INDIAN, NEGRO, AND YANKEE

Characters, which make an agreeable variety in the narrative. There is nothing of the flash order in the composition of the work but it is evidently the PRODUCTION OF A CULTIVATED INTELLECT AND TASTE.

In all respects it is creditable to the author, and in my opinion would be received with a considerable slare of public favor."

cene of this story is laid in Detroit, commencing at that period when it was an antiquated, picturesque French town, its inhabitants mostly composed of French settlers, fur traders, Indians, half breeds—the faw Americans consisting of the officers of the Government, and those of the military, with ever, trings at the control of the story are exceedingly fresh, and its interest quite absorbing. Its picture-sque descriptions, its odd characters, marked by broad and humorous individualities, its new and novel incidents, and the really very superior merit which it manifests in its style and treatment, combine to afford us a de-lightful picture of a phase of American like but little known. All who read the work, we are assured, will find a profound pleasure in its perusal, and, for a good book and a fresh book,

THE SHIP-CARPENTER'S FAMILY.
A TALE OF DOMESTIC LIFE.
By W. E. WHITMAN.
One Volume, cloth, illustrated. Price \$1.

This is one of those highly interesting narratives which neces sarily take a strong hold of the popular mind. It tells in simple truth-like terms of the numerous struggles and disappointments truth-like terms of the numerous struggles and disappointments to which the humble mechanic is subjected who has a large family dependant upon his unaided exections for support. It shows how honest, patient, unwearied industry is sure of success at last in this country, where perhaps labor holds a nobler position than it does in any other land. It is a story that will position than it does in any other tand. It has sory that will cheer the sinking bearts of the poor, and incline the rich to look more kindly upon the less fortunate in worldly matters. It will be read with equal interest by all classes, and by persons of all ages—and no one will lay the book aside without feeling that he has, morally speaking, benefited by its perusal. One of our most popular authors and lecturers has declared it to be the best work of the kind he has ever read, and he has been so delighted with it that he has consented to write the preface him-self. It should not only be read in every family, but should be ound in every Sunday-School Library, for no work of the day nculcates better teachings to the young.

The following volumes of Abbott's Illustrated Historics as

The successive volumes of the series, though they each contain the life of a sagle individual, and constitute thus a distinct and independent work, follow each other, in the main, in regular historical order, and each one continues the general narrative of history down to the period at which the next volume takes up the story; so that the whole series will, when completed, present to the reader a connected narrative of the line of general history from the present age back to the remotest times.

The narratives are intended to be succinct and comprehensive, and are written in a very plain and slinple style. They are, however, not juvenile in their character, nor intended exclusive each history to comprise all the leading facts in the life of the personage who is the subject of it, and thus to communicate all the luformation in respect to him which is necessary for the purposes of the general reader.

Such being the design and character of the works, they would seem to be specially adapted, not only for family reading, but also for district, town, achool, and Sunday-school libraries, as well as for text-books in literary seminaries.

The volumes already leaded have had a wide circulation in all parts of the country—nearly two hundred thousand volumes already sold. The plain of the series, and the manner in which the design has been carried out by the author in all parts of the country. The whole series has been introduced into the school-libraries of several of the largest and most influential States.

III.

THE ILIAD OF HOMER. Literally translated, with Explanatory Notes. By THEODORE ALOIS BUCKLEY, B.A. Portrait, Iliano, muslin. 25c.

The present translation of the "Hlad" will, it is hoped, be found to convey more accurately than any which has preceded it the words and thoughts of the original. It is based upon a careful examination of whatever has been contributed by achelars of every age toward the alucidation of the text, including the ancient echoliasts and lexicographers, the exceptical libors of Barnes and Clarke, and the alaborate criticisms of Hayne, Wolf and their successors. Homeo's "Hlad" forms the tenth volume of HARPER'S NEW CLASSICAL Library.

The wart of a series of literal translations of the Greek and

"Hisa" forms the tenth volume of HARPER'S NEW CLAS-SICAL LIBRARY.

The want of a series of literal translations of the Greek and Latin authors who are usually studied in the American course of academic education has been long felt by the most intuitient and assiduous classical teachers. That they are capable of being abused by the indolect and unfaithful pupil is no plea against their utility when employed in their legitinate pleace. A translation of an ancient writer into English, as perfectly literal as is permitted by the idioms of the respective languages, affeds an invaluable sid to the instructor in the second-plannent of his arduous task. If executed with fidelity and skill, it saves much time and labor in the consultation of dictionsries, and embodies the best results of philological acumen and research in the shortest possible space. Pages of learned commentary are thus concentrated in the rendering of a single word.

The works which it is proposed to lestes are reprints from Bohn's Classical Library," brought out uniform with the English edition, and comprising faitful translations of the principal Greek and Latin classics.

Each work will be given without shridgement, and will include short suggestive notes, adapted to the comprehension as well as the artmal wants of the student. Copious and accurate indices will be appended to every translation. No version with be gioused with the present improved state of philological learning.

This NEW CLASSICAL LIBRARY has received a cordisi

ries confined to teachers by profusion. Every reading man-though destitute of a knowledge of the ancient languages, feels i had a language of the same in the languages, feels parable models of literary art which they have preserved. In the literal translations with which he is furnished by the pre-ent series, he will find the information he seeks, enabling him to comprehend current classical allusions with facility, to be-come familiar with the true spirit of the ancients, and to share in conversation and studies which presuppose a knowledge of Greek and Roman antiquity.
